# MAGNER 165

## BANKNOTE COUNTER

The Magner 165 is designed and incorporated with high performance expectations in mind for the future here today. The model offers the latest technology for demanding detection and accuracy needs. When faced with difficult tasks and new market demands the machine is ready to answer back with support and superior performance. Network updates ensure you always have the latest updates for currency changes and new security breaches. Data transfer to your working infrastructure means more time spent on more important tasks.

### Functional capabilities:

- Counting speed: 800/1000/1200 banknote per minute allows for adjustment to count banknotes of different fitness quality. 1000 npm Serial reading up to 1200npm.
- Detection: Very powerful full 2sided RGB CIS with IRT/ UV/ MG/ Powerful high speed serial number processing
- Automatic and Manual start with Multi-teller application perfect for 2 dual user operation
- Batch mode (1 to 999) with network connectivity for speeds at 1GB for fast data transfer to meet future needs
- Support for updates via remote, usb, and manager installed applications. Keeping software at its peak performance.
- Excellent connectivity for USB/LAN/RS232 for multi-operation connectivity to ensure performance is always up to date
- Touch screen display allows very user friendly interaction and clear information results
- Banknote thickness adjustment for multi-currency applications
- Connection to external display and PC for data transfer or display
- Very large storage memory for machine performance up to 40 currencies
- Compact size;
- Automatic mode to place any banknote in the machine and it will inform currency type and value of all mixed notes counted

### SPECIFICATIONS:

Counting speed	800/1000/1200 banknotes per minute
Display	Touch screen
Banknote size	40~180mm (width), 50-190mm (length), 0,05-0,2mm (thickness)
Hopper capacity	500 banknotes
Stacker capacity	200 lower pocket/ Reject 60 upper pocket
Counting number display	Beautiful color touch screen with multi-operational features
Feed system	Roller friction system with high quality construction
Detection	2 CIS RGB/IRR/IRT/VR/MG/UV Network interface updates
Power supply	100-240V, 50/60Hz
Dimensions	26CMx26CMx28CM
Net weight	10 kg
Currency Capacity	Up to 40 different world currencies available in one machine
